

The background of the slide is a 12-lead ECG tracing on a standard grid. The leads are arranged in three columns and four rows. The top row shows leads I, II, III, and aVR. The middle row shows leads aVL, aVF, and V1. The bottom row shows leads V4, V5, and V6. The ECG shows a regular rhythm with a rate of approximately 70-80 bpm. The PR interval is normal, and the QRS complexes are narrow. The QT interval appears slightly prolonged, consistent with the title of the event.

ZATERDAG 2 MAART 2019

**LANDELIJKE BIJEENKOMST VOOR
PATIËNTEN/ FAMILIES MET HET
LANGE-QT SYNDROOM**

Locatie: Amsterdam UMC, locatie AMC, collegezaal 2

Tijd: 12.30 – 16.30
